Webinar Description: Is your practice experiencing challenges to payment collections from shrinking insurance reimbursements or changes in fee structure, changing regulations like HIPAA 5010 or beginning to prepare for ICD-10 billing in 2013, and rising business and drug costs? If so, then why not take some time to look at ways to help accelerate cash and have lending options as part of a liquidity plan to weather these common industry challenges.

The ICD-10 implementation deadline is October 1, 2013. Are you thinking ahead? This webinar will provide you with information to help build your cash reserves and create liquidity now for your business to offset the short-term effects of ICD-10.
